

Rex
Smoke Pearl

blending. Animals that are too light or too dark are to be faulted. Scattered white hairs or lack of darker color in the loin area is a fault.

Smoke Pearl—the surface color is to be a rich smoke gray on top of the head, ears, back, outside of the legs, and top of the tail. The surface color will fade to a pearl gray on the sides, chest, belly, inside of legs, and underside of tail. Dark face color is to fade from the eyes to the jaws and blend with the chest color. All blending of color is to be gradual and free from blotches or streaks. The undercolor will be slightly lighter than the surface color. Eyes—blue-gray, ruby cast permissible.

Faults—fault animals that have streaks, blotches, or poor color

Insert for 2026-2030 ARBA Standard of Perfection

*Eligible to be entered in all ARBA sanctioned shows as exhibition animals. May **NOT** compete for Best of Breed/Best in Show*
