English Crested

GROUPS: SELF—AGOUTI—SOLID—MARKED—TAN PATTERN—CAL PATTERN

Type	**20**
Coat	**10**
Ears	**5**
Eyes	**5**
Crest	**25**
Color	**25**
Condition	**10**
TOTAL	**100**

DESCRIPTION:
The Crested has a short coat that grows straight back, with one rosette centrally located on the head, without ridges or other rosettes. The breed should have a solid body and a distinctly smooth profile without exaggeration.
Note: *The crest should be handled so that it will set up and radiate to its fullness. Shape the crest with your hand, but do not crush it.*

TYPE–Points 20: Cresteds are to have a high, full crown, broad shoulders, medium body length, strong midsection, and well-filled hindquarters. The body should be of equal width throughout. Topline, viewed in profile, descends slightly from crown to well-rounded, smooth hips. Head has a wide, blunt Roman nose.

Faults–Dip in topline; prominent hips that interrupt the flow of the topline

COAT–Points 10: The Crested coat should be short and even; finished and soft to the touch.

Faults–Coat too harsh or thin in density; over 1 inch in length. Feathering.

Disqualifications from Competition–Side whiskers, ridges, rosettes or parts of rosettes in the coat other than the crest- including hair reversal on the feet; satin sheen–not to be confused with the natural luster of some colors.

EARS–Points 5: The ears are to be shapely and slightly dropping, but not fallen. Ear color to match the variety description.

EYES–Points 5: The eyes are to be large, bold, and bright. Eye color to match the variety description.
CREST–Points 25: The crest is a rosette which rises and radiates evenly all around, forming a full circle with a clearly defined pinpoint center and abundant depth. The crest is centered on a line running from the tip of the nose to the center of the ears. The center of the crest is to be no further forward than the back of the eyes, nor further back than the front of the ears. When evaluating the crest, it should be handled so that it will set up and radiate to its fullest. Do not crush the crest. Cresteds should have the color(s) of the crest appearing on the body of the animal.

Faults–Doubling, guttering, open center, off-center rosette, or flat in shape. Any shape other than round and asymmetrical.

Disqualifications from Competition–Absence of the crest.
COLOR–Points 25: Color is to match the variety description. In marked varieties color points are to be divided equally: ½ the points to color quality and ½ the points to pattern or markings.
CONDITION–Points 10: Per ARBA definition.
