

Siamese Sable Britannia Petite

Color—The surface color of the face, ears, back, legs and the top of the tail is to be a rich sepia brown. The surface color will fade to a lighter sepia on the sides, belly, chest and underside of the tail. The rich sepia brown color on the face is to fade from the eyes to the jaws and blend evenly with the chest. All blending is to be gradual and free from streaks and blotches. The undercolor will be slightly lighter than the surface color. Eyes—Brown.

Faults—Scattered white hairs; surface color showing streaks and/or blotches;
